

## **Plumbing Permits**

The Arkansas Department of Health requires that no water shall be provided to any newly constructed residential, commercial, or industrial building until all plumbing has been inspected and approved by the licensed Plumbing Inspector for the District, or the State Plumbing Inspector for Garland County.

Plumbing Permit is \$100.00 and obtained from the North Garland County Regional Water District office. Typically, four inspections are required:

1. Rough-in / slab inspection
2. Top out inspection
3. Water service inspection
4. Final inspection.

The meter will not be set until the Permit fee has been paid.

Plumbing shall not be covered until inspections have been approved.

Job meters will not be set until the meter deposit and anticipated Permit fees are paid and approved vacuum breakers are installed on any water outlets. Water outlets found to be in violation will be removed from service!

The District is responsible for maintenance only to the meter. The customer is responsible from the meter to the residence or business.

**\*\*A SEPTIC APPROVAL MUST BE OBTAINED FROM THE ARKANSAS DEPARTMENT OF HEALTH FOR ALL NEW CONNECTIONS\*\***
